<u><i>DNA Tests</i></u>	<u><i>Cost</i></u>
146 Scrapie Codon (NN, NS, SS results)	\$11.50
222 Scrapie Codon (QQ, QK, KK results)	\$11.50

<u><i>ELISA/ Antibody Tests</i></u>	<u><i>Cost</i></u>
Johne's – N= Negative, P= Positive, B= Borderline	\$8
CAE (Caprine Arthritis Encephalitis) - N= Negative, P= Positive	\$8

**DNA SAMPLE METHODS & SHIPPING INFORMATION**

**BLOOD TUBES**– Collect 2-3 cc's of whole blood in a **“purple top” EDTA tube**  
(Be sure to rock the tube back and forth immediately after collection).  
**Shipping tubes:** Ship tubes in well padded box.  
In hot months ship via 1-3 day delivery with ice. In cooler months, ship via 1-5 day delivery without ice.

**PRESERVED TISSUE**  
**DNA EAR PUNCH** systems such as Datamars, Hauptner-Typifix & Allflex (Call the office to order supplies).  
These methods all have a preservation agent in the collection tube. After collection the tissue can be stored for several years at room temperature. Do not refrigerate or ice these types of tissue sample.  
**SHIPPING DNA TISSUE PUNCHES:** Ship in a padded envelope or box via regular/ ground delivery.

**FROZEN TISSUE:**  
The tissue can be taken from almost anywhere on the animal, but is usually an ear or tail sample.  
If the animal is deceased, any non decayed sample is acceptable.  
The sample must be a minimum of 1/4” and **must be frozen very soon after collection.**  
**SHIPPING FROZEN TISSUE:** Ship over night on ice.

**BLOOD CARDS**  
We are set up to use FTA Whatman blood cards. If you choose to submit another brand of blood card, we will do our very best to get a result for you, but we can not guarantee that we will be successful. We use the Whatman protocol and reagents and this method is not ideal for other blood card brands. If we are unable to get a result, you would need to resubmit the sample and pay to have the sample tested again.  
If you use Whatman cards and we do not get a result, you can resubmit at no additional charge.  
**SHIPPING BLOOD CARDS:** Blood cards can be shipped via regular/ ground delivery.

**ELISA SAMPLE METHODS & SHIPPING INFORMATION**

For Elisa testing use a “red top” or Serum separator tube. If you are doing DNA & ELISA tests on the same sample, you must submit 2 tubes. One in the “purple top” EDTA tube for the DNA testing and 1 in the “red top” serum tube for ELISA/ Anti-body testing.

**PAYMENT METHOD:** Check Enclosed ☐ Charge my Credit Card ☐  
(Visa, MasterCard, Discover)

\* **RUSH TESTING** 24-48 hour RUSH option is available for DNA testing only (weekends are not included in the 24-48 hours). Cost is \$10 extra per test (not per sample).

Example: If you have a sample that you would like Codon 146 (\$11.50) and 222 (\$11.50) and you want to rush both tests, the rush fee would be \$20, making the total for that sample \$43.

Check the "RUSH" box next to each sample that you would like to have rushed. If there is more than one test requested for that sample, indicate in the notes section if all tests should be rushed for that sample, or only some should be rushed.
